ClinicOS

Patient care and clinic operations, in one workspace

For medical and cosmetic dermatology clinics in Iraq

A client introduction

A clinic day depends on clear handoffs

At reception

The right patient

The right appointment

The current visit status

During care

Previous visits and history

Reports, consent and photos

The next clinical task

At the end of the day

What patients owe

What the clinic received

What needs attention

ClinicOS keeps these records connected to the patient and the clinic.

One patient journey connects the team

01

Find the patient

Search or register

02

Book and check in

Appointment or walk-in

03

Record the visit

History and care plan

04

Review and sign

Signed record and prescription

05

Invoice and receive

Payment and receipt

Each step stays connected to the patient

Reception and clinicians work through their own accounts.

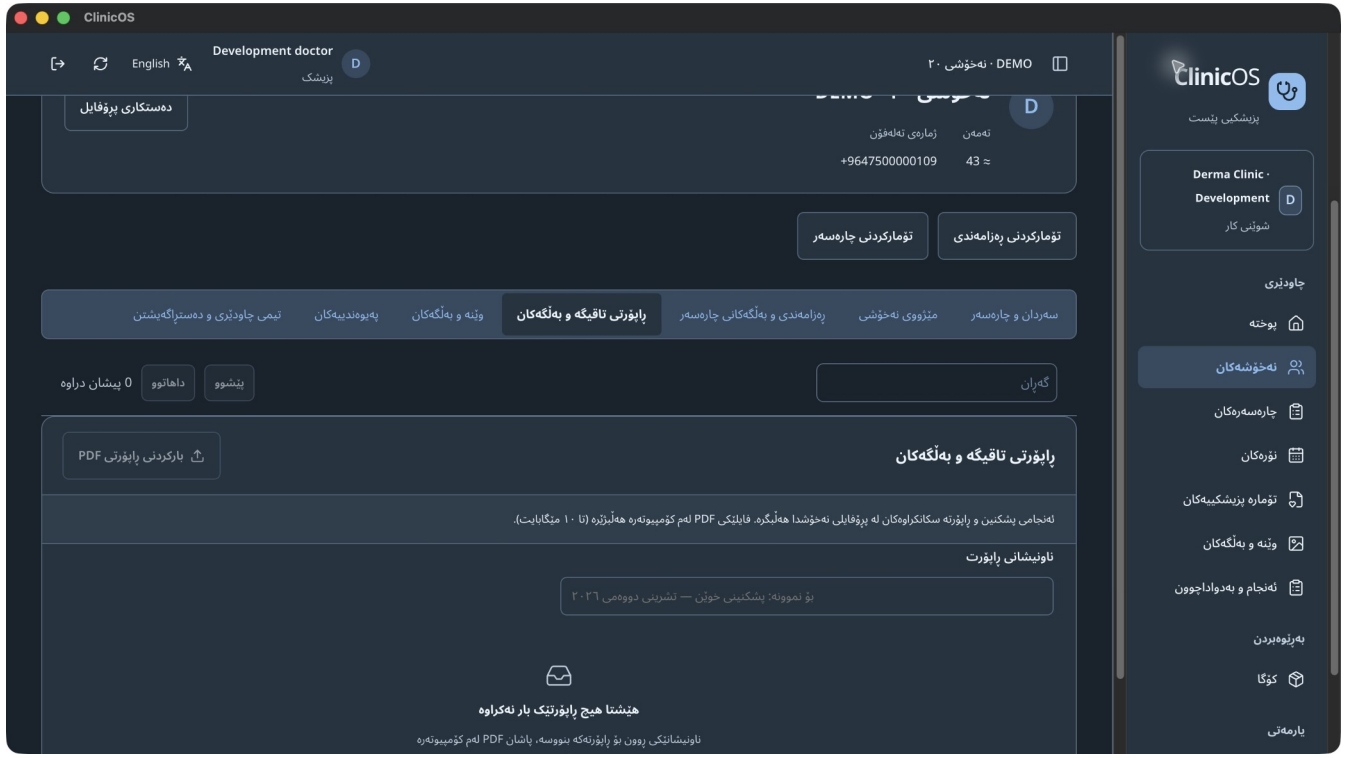

Patient context at the next visit

History the team can find

Visits, allergies, diagnosis and treatment plans.

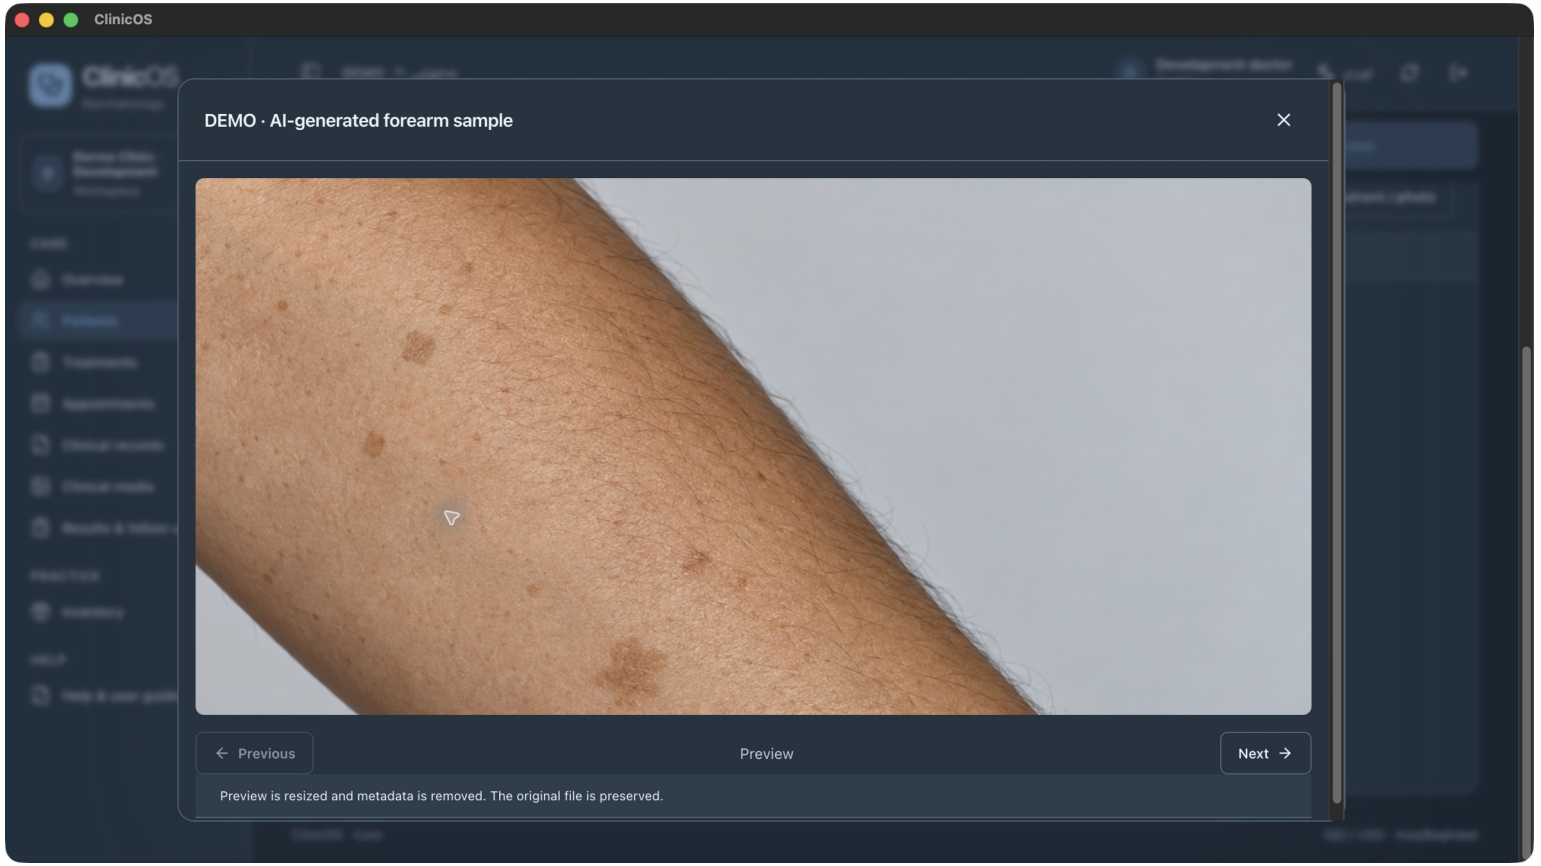

Reports and documents

Consents, prescriptions, care documents and named PDF reports.

ClinicOS demonstration screen with a fictional patient

Reports and photos stay with the patient

Synthetic demonstration image

Named reports

Lab tests and scanned PDFs linked to the patient.

Photo gallery

Thumbnail browsing, larger views and preserved original files.

A clearer view of clinic finances

IQD

Separate currency totals

Review balances and activity in each original currency.

USD

Recorded exchange rates

Keep the rate used for a cross-currency payment.

Invoices, payments, deposits, packages and refunds

Daily follow-through beyond the consultation

Follow-up work

Orders and received results

Review and patient notification

Due follow-up tasks

Inventory

Product lots and expiry dates

Stock use and adjustments

Low-stock and expiry alerts

Management

Receivables and expenses

Cash and till differences

Reports and accounting exports

Clear responsibility for each staff member

Individual accounts	Each person signs in under their own identity.
Clinical access	Permissions and care assignments control patient records.
Recorded changes	Audit records help review who did what.
Original records	Signed care and posted finances retain their history.

Built around the clinic's local working context

English and Sorani

Right-to-left layouts and Baghdad time

IQD and USD

Medical and cosmetic dermatology workflows

A clinic pilot makes the fit clear

A tailored demonstration around your workflow

01

Your daily workflow

02

A fictional patient journey

03

Clinic setup and staff acceptance

Let's plan your clinic demonstration

Setup, onboarding scope and pricing are agreed for your clinic.

Demonstration version. Clinic-specific setup and production acceptance required.
